

American Jetway Corp.

Aerosol, Liquid and Specialty Packaging

Product Catalog

AMERICAN JETWAY CORPORATION has been in operation since the early 1960's and is a strong customer driven company specializing in the packaging of aerosols and liquids. The company is located on seven acres of property providing ample room for expansion. Our focus is in providing our customers with quality products, short lead times and economical minimum runs. We are committed to the philosophy of not competing with our customers and package only private label products

AMERICAN JETWAY CORPORATION has a full technical staff qualified to handle research, development, regulatory, and manufacturing process controls that can meet ISO requirements. We currently fill more than 500 different formulations developed in house, at times, with the direct involvement of the customer. We have a full line of VOC compliant products to meet the growing needs of California (CARB), the OTC (Ozone Transportation Commission) and the newest EPA regulations.

AMERICAN JETWAY CORPORATION has continued to expand its manufacturing capabilities. In addition to two fully automated aerosol lines the company has installed several pieces of equipment to fill specialty items, including liquid filling and shrink-pack kits.

AMERICAN JETWAY CORPORATION has a support staff that is knowledgeable in the automotive, industrial, janitorial, and car-detailing products. In addition to working with the customer on product line development, our staff will work very close with the customer on new formulations, reformulating existing products, and help the customer's sales force better understand their products.

Ammoniated Glass Cleaner

- Very effective all-around glass cleaner where foam type sprays are desired.
- Foams on contact and clings to surface enabling it optimum penetration
- Safe on most surfaces (including vinyl and leather)
- Streaks and greasy residues are eliminated fast and easy
- Can be used as an effective stainless steel cleaner
- Removes haze from tobacco smoke and other pollutants where air is not generally circulated
- For use in homes, businesses, hospitals, schools, hotels, motels, car dealers, body shops and other institutions

Vinyl and Leather Cleaner

- Penetrating action works well on cleaning dirt and grime from many vinyl and leather materials
- Fast-acting and effective in numerous cleaning applications
- This formula is effective when left to soak allowing it to go to work on cleaning the material and then permitting the removal of the dirt by use of a rag or cloth
- For use with furniture, luggage, coats, golf bags and all other articles made of leather, vinyl or plastic
- Easy application and removal
- Can be used to clean teak

Furniture Polish

- Efficient polish for furniture, vinyl, wood and Formica applications
- This product cleans, preserves and protects in one easy operation
- One-step dispensing of the thick and creamy polish which leaves a protective film to the material
- Leaves a high luster on materials
- Protects against normal wear and tear allowing for longer material life
- Can also be used on fiberglass and metals

Non Ammoniated Glass Cleaner

- Completely void of ammonia yet is formulated for fast cleaning
- This product leaves no film which can leave streaking or smudge-like residue
- Removes grease, salt spray, road film, insects and mild paint overspray
- Works extremely well in hard to clean situations
- Fast-acting and non-toxic formula
- Works on removing chemical residues
- Suitable for use on automotive glass, mirrors, stainless steel, porcelain, chrome, tile, windows and any non-porous surface
- Safe on plastic and tinted windows

Carpet & Upholstery Cleaner

- Formulated for tough cleaning jobs on carpets and upholstery
- Special ingredients allow for deep penetration and efficient removal of dirt and grime from within material
- Uses unique dry foam which inhibits wetting and extends material life
- Vacuum cleaner friendly
- Free of chemicals which attract dirt
- Retards re-soiling of material
- For use with carpeting, rugs, remnants, upholstery and other textured materials.

Rug and Fabric Cleaner

- Highly concentrated formula which performs an effective cleaning job
- Uses a relatively dry foam, which enables fabric materials to be cleaned without being soaked
- Cleans vinyl, leather and plastic
- Uses special gentle cleaners which restore texture to the treated material
- Cleans vinyl, leather, plastic, cloth, rugs, velour and fabric

Dust Mop Treatment

- This product prevents dust from dispersing by causing it to come together as lint, which does not scatter
- Can easily be washed out of mop head or rag with water
- This formula is designed to pick up dust like a magnet
- For use on dust mops and dust cloths
- Equally effective on Venetian blinds, window frames and sills, wood floors, furniture, concrete floors and tile

Air Fresheners

- Jetway offers a full assortment of fragrances
- Developed to provide a pleasant atmosphere
- Great for automobiles, homes, offices etc.

Drain Cleaner/Freshener

- Leaves drains smelling fresh
- Excellent cleaning characteristics
- Eliminates stubborn drain clogs
- Apply product with the supplied 3 foot extension hose

All Purpose Cleaner

- Dispenses a powerful activated foaming agent which clings to dirt, penetrates it and allows for easy removal with a rag
- Very useful in most cleaning situations
- Will not leave grit or soap scum
- Removes stubborn stains and leaves a pleasant odor
- For use in hospitals, nursing homes, schools, hotels and offices
- Great for cleaning hard surfaces such as walls, sink tops, tables, chairs, telephones, bathrooms, shower stalls, bathtubs, hampers and cabinets

Fabric Guard

- This formula penetrates fabric fibers and offers long lasting protection
- The ultimate in stain resistance against a wide variety of liquid spills, dirt, greases and oil
- Prolongs the life of fabrics by creating a barrier that is hard to break when it comes to the dangerous elements
- Can restore total water and stain repellency to raincoats and other equipment
- Will not cause discoloring
- Ozone safe
- Can be used on clothing such as: boots, shoes, hats, sneakers, pants, ties and other accessories
- Also efficient on home and office furnishings including: upholstered furniture, draperies, tablecloths and place mats
- For use with outdoor equipment, sports equipment, boat and trailer accessories

Heavy Duty Brake and Parts Cleaner

- High quality formula dissolves and removes grease, oil, grime and excess brake fluid
- Brake disassembly is not required to achieve proper cleaning
- Stops brake squeal
- Cleans with high pressure
- This strong formula leaves no residue and is non-flammable
- Cleans deep and evaporates quickly
- Can be used to clean and degrease electric motors, cables, bearings, gears, fans, hoists, gold and silver contacts, guns, air conditioners, etc.
- Not recommended for use with certain paints, plastics, rubber and other synthetics

Air Intake System Cleaner

- Cleans the contamination which accumulates in various parts of the Air Intake System
- Especially formulated to clean and completely flush out any dirt that could be restricting or interfering with the precise operation of the Air Intake System
- Useful for cleaning throttle valves, throttle bodies and idle air control valves
- Helps keep engine running smoothly

Carburetor and Choke Cleaner

- Removes tough deposits of gum, varnish and carbon
- Unique formula has a special blend of fast-acting solvents that completely clean and restore total engine performance
- Uses high pressure delivery which helps to lubricate linkage and controls
- Safe to use on catalytic converters and oxygen sensors
- Reduces cleaning intervals by preventing build-up of contaminants
- Maximizes fuel economy

Foamy Engine Degreaser

- Quick and easy way to clean and remove grease and oil from auto, aircraft, lawn mower, marine, snow blower and engines of all types
- Removes tar and tree sap from vehicles without harming paint; must be sprayed onto a damp rag and rubbed on; do not spray directly onto paint finish
- Excellent for cleaning driveways and garage floors
- Not harmful to paint, rubber, or wiring when used as directed

Heavy Duty Cleaning Solvent

- Fast-acting cleaning solvent removes silicone, adhesive, wax, grease, oil, tar, paint overspray and road film from metal, vinyl, rubber, rigid plastics and cured paint
- Leaves no residue and promotes adhesion
- This formula is an outstanding cleaner and degreaser of metal surfaces in automotive, marine and industrial maintenance operations
- Prepares for bonding of parts
- Jet action blasts away dirt, grease and oil

Non-Chlorinated Brake Cleaner

- High quality formulation will not contaminate solvent cleaning dip tanks or other recyclable waste solvent cleaning systems
- Can be applied without disassembly of the brake system
- Can be used on both disc and drum, as well as CV joints
- Uses a high pressure delivery system that will not leave a residue
- Economical to use
- Cleans and evaporates quickly
- Dissolves and removes tough build-up

Mass Airflow Sensor Cleaner

- Improves performance and reliability of the Mass airflow sensor
- Improves the vehicle's air/fuel ratio, horsepower and miles per gallon
- Removes carbon and contaminants from the mass airflow sensor safely without harming vital auto components

Citrus Degreaser

- Formulated to clean all mechanical engines, machinery and tools
- Made to penetrate through grease and grime in a quick manner
- Dissolves oil and grease deposits on auto and truck engines, lawnmowers, marine and farm equipment, engines of all types, grills and machinery and excellent for use on grease spots on garage floors and driveways
- Will not harm paint, rubber or wiring when used properly
- This formula is citrus based and VOC compliant in California

Contact and Electric Motor Cleaner

- Specialty cleaner/lubricant that was specifically formulated for general maintenance of heavy-duty electric equipment and metal instruments
- The cleaning solvents are blended with a specialty lubricant that efficiently dissolves grease, oil, dust and oxidation and deposits a fine mono-molecular film to protect against corrosion and restore conductivity
- May be applied without dismantling and reassembly
- Works well on electric contacts, distributors, generators, electric windings, starter motors, rheostats, jacks, buss bars, heat control devices, transfer switching systems, armatures, coin-operated machines, registers, ventilation equipment, air conditioning equipment, power equipment and conveyors

Battery Cleaner/Leak Detector

- Great for removing power sapping corrosion from all battery parts
- As a detector of acid the formula will turn color (pink or red) when in contact with battery acid----this may also indicate that the area needs another cleaning
- Easily washed away-no difficult clean-up
- Will neutralize acid and dissolve corrosion from terminals, cables, hold-downs and boxes
- Can be used for all automobile, marine, aircraft and industrial batteries
- After initial cleaning reapply to guard against future formation of corrosive deposits
- Overall this product is great for reconditioning batteries and pinpointing leaks

Electrical Switch Cleaner

- The quick and safe way to clean electric motors without disassembly
- This product dissolves greases and oils
- Floats away dirt and grime that is harmful to moving parts
- Fast evaporating formula that cleans and leaves a dry surface that leaves no residue
- A fast and easy way to clean metal and leave a light protective film
- Works well on electric motors, starters, generators, circuit breakers, switches, relays and other electrical equipment

Graffiti Remover

- Designed to remove graffiti in the form of crayon, spray paint, markers, ball point pens, stencil ink. Mimeo ink, scuff marks, tars, pencil, lipstick and other marks of vandalism
- Ideal to use on road signs, washroom walls, sidewalks, public buildings, bowling equipment, railroad bridges and underpasses
- As simple as spraying on cloth and wiping away

Gasket and Paint Remover

- Quickly removes paint and varnish from any material in minutes, including baked on enamel
- Will not run, adheres very well to vertical surfaces and is safe for use on all types of metals, wood and plaster
- Attacks and breaks down paint and bumper stickers, gaskets, logos and decals, asphalt and dried oil
- Also removes hardened grease and diesel fuel build up
- Works well for industrial, automotive, marine, agricultural equipment, paints, gaskets, lacquer, latex, enamel, shellac, varnish, baked grease and carbon deposits

4-Way Lube

- Very effective in displacing moisture, an excellent penetrant, lubricant and corrosion inhibitor
- Rapidly separates water from metal surfaces
- Non-staining rust preventative
- Excellent for drying out ignition wires, loosening rusted bolts, lubrication of noisy parts and corrosion protection of parts and equipment exposed to the elements
- Can be used on relays, aircraft parts, spark plugs, farm machinery, armature windings, locks, circuitry, tools, linkage, generators, marine engines, precision instruments, guns, switches, coin operated machines, fishing equipment and fish flies
- Low surface tension
- *Can be formulated using PTFE which adds extra lubrication for high heat applications*

Chain and Cable Lubricant

- This formula has superior penetrating properties for maximum coverage and lubrication
- Unique foaming action encourages retention on vertical surfaces
- Contains “Moly” which continues to lubricate at high temperature
- Promotes high lubricity which causes it to last longer and cuts down-time
- Product stays in service; resists dirt, sand and dust
- For use in conveyor rollers, sprockets, cutter bars, chain saws, motorcycle and industrial chains

Light Oil Chain Lubricant

- Specifically formulated for use on chains and sprockets
- Unique foaming action penetrates and lubricates deep down into chain linkage
- Special inhibitor stops rust and corrosion in vital working mechanisms under all climatic conditions
- This product works well on links and roller chains, sprockets, chain saws, cutting bars, conveyor chains, elevator chains etc.
- Reduces friction at critical wearing points
- Increases chain life up to 300%
- Clings and holds to metal making for a lasting lubrication

Foamy Metal Cutting Oil

- This formula was created specifically to prevent distortion and increase tool life when applied to stainless steel, brass, copper and allied metals and alloys
- Highly recommended for all types of drilling, tapping and reaming applications
- Also used in pipe threading applications for better product, quality and reduced work time
- Suitable for use in drilling, tapping, reaming, thread cutting, milling, grinding, boring, sawing and turning
- High performance--no-waste formula

Penetrating Gel Lubricant

- Clean and transparent lubricant with excellent penetrating and adhesive properties
- The adhesive strength insures that when properly applied the lubricant will remain in place and resist throw-off, wash-off and high pressure vibrations
- A unique rust preventative additive coupled with a combination of lubricants makes this formula rust and corrosion resistant as well as being able to service a wide temperature range (-30°F to +530°F)
- Has a gel-like consistency which allows for maximum penetration
- Product sets up fast and forms a grease-like transparent protective gel coating

Open Gear/Wire Rope Lube

- High-performance lubricant that penetrates pores of metal surfaces
- With the addition of “moly”, load bearing capabilities are enhanced as well as shear and high temperature stability
- A special tackifying agent is added to allow this formula to resist throw-off and wash-off, reducing the chances of exposing bare metal and increasing service life.
- Clings to linkage and gear; less reapplication costs
- Quiets gear noise

Heavy Duty Rust Inhibitor

- This formula was designed to prevent rust and corrosion under the most severe conditions
- Product sets up as a near transparent film that adheres firmly after the coating dries
- The film is self healing and will not crack, flake or run
- Protects against salt water spray, rain, humidity and temperature variations
- Provides maximum protection for all types of equipment during shipment overseas
- Can be used with farm machinery, motors, hand tools, weapons, production equipment, naval ordinance systems, all types of marine applications, aircraft and allied long term outdoor protection

Greaseless Lubricant

- Specially formulated to give the maximum in penetrating and lubricating ability
- This product is non-flammable and can be used in high heat applications
- Exhibits very effective capillary action which results in rapid and wide dispersion
- Has low surface tension which allows for optimum penetration of metal porosity
- This high quality formula helps to cut cost by reducing the lubricating intervals
- Great for removing rust and renewing metal surface
- Allows for efficient operation of moving parts

Chilling Penetrating Oil

- Takes penetrating of rusted pieces to the next level
- Chills stubborn parts to "freezing level" and frees the part
- Leaves behind an excellent lubricant to inhibit rust
- Reduces friction

Penetrating Oil

- Formulated from the finest concentrates to provide protection and lubrication of the highest degree
- In addition to freeing rusted and corroded parts, it leaves behind a clean high quality film which inhibits corrosion and continues to penetrate and protects over long intervals
- These oils also enable the formula to release frozen or rusted bolts and lugs
- Effective capillary action which results in rapid and wide dispersion of product
- Has low surface tension which aids in penetrating metal porosity
- Leaves a long lasting oil which keeps out moisture and prevents rust
- Non-flammable
- Great for removing rust and restoring metal surface

Penetrating Oil with Graphite

- Highest quality oils are used in combination with graphite to provide a long lasting formula
- Designed for fast penetration into tight fitting parts as well as the quick release of frozen or rusted metal parts
- The freed metal surfaces continue to remain protected by the graphite addition
- Lubrication continues long after conventional products have washed away or evaporated
- The graphite additive also assures good load bearing qualities and helps resist breakdown under temperature variations
- Has low surface tension which allows it to move and penetrate between rust breaking down oxidized metal

Brake & Caliper Lube

(Non-curing)

- This lubricant is a grease-like formula that contains inert amorphous silica filler in combination with selected polydimethyl silicone fluids
- This product has excellent dielectric properties
- Exhibits water repellency, resists oxidation and is essentially nontoxic and non-melting
- Will operate in a wide temperature range (-40°F to 400°F)
- Nonvolatile and resistant to a wide variety of chemicals and is excellent for lubricating rubber and plastic components
- Excellent lubricant for automotive braking systems, outdoor equipment and other critical components
- Can also be used as a moisture proof seal for spark plug connections and ignition systems
- Great for use in O-rings (both rubber and plastic) and as a chemical barrier coating

Automotive Belt Dressing

- This formula can be used with a wide variety and sizes of power belts
- Eliminates squeals and the belt is kept soft, flexible and lubricated
- Ingredients used are beneficial to rubber, canvas and v-belt surfaces
- Use with flat, round or v-style belts of rubber, leather or fabric materials
- Stops belt slippage: increases rpm and horsepower
- Formula has protective ingredients which prevent migration of dust and dirt

Battery Protector and Sealant

- This protector and sealant contains high quality corrosion inhibitors for long lasting protection
- Once applied the protective coating will not harden and should be applied to exposed metal surfaces to include hold-down clamps, trays, cables and battery posts
- Coating is long lasting, flexible and visible
- Resistant against caustic fumes
- Can be removed with a safety solvent making successive cleaning and reapplication fast and easy
- For use in automobiles, truck fleets, golf carts, fork lifts, marine and aircraft applications and light and heavy industrial generators

Brake Silencer

- Formulated to absorb noise and eliminate brake squeal
- Forms a water-resistant film that also helps prevent rotor warping; extending brake life
- Effective on all braking systems and can be easily applied to new or existing pads
- The hi-temp and water resistant film aids the product in noise absorption
- For use in all automotive types: Cars, trucks, buses, etc.
- Made for all braking systems including ABS & Disc

Brake Finishing Treatment

- A gray spray-on metalizing treatment designed to prevent brake noise at the source
- Microfine aluminum particles form a molecular bond with the rotor/drum friction surfaces, ending annoying vibration and brake squeal
- Effective on all brake systems and actually extends the life of the brake components
- Benefits last for one year or 10,000 miles of average driving

Silicone-Free Rubber Treatment

- A treatment for all rubber surfaces including tires, mats, mud flaps and rubber surrounds. Restores the natural appearance.
- Offers users ease of application. This unique dressing shines and protects interior and exterior rubber, vinyl, plastic and leather surfaces. It goes on quickly and leaves tires shiny black in seconds
- Body shops and other users concerned with paint contamination will appreciate the deep, lustrous gloss imparted by this premium dressing
- Safe for use in body shops, given the silicone-free formulation

Heavy Duty Red Grease

- Highly effective in protecting and lubricating all types of industrial bearings, striker plates, chain and cables, etc.,
- Will not break down or oxidize under conditions of extreme load and high pressure
- Will service to temperature up to 350° F
- Not affected by salt spray, alkalis, acid attack and water pressure
- Dust and dirt can not migrate or penetrate into this formula
- For use on industrial bearings, chemical service areas, electrical motor shafts, truck and trailer fifth wheels, roller chains, agricultural hitches, heavy equipment, cables and pulleys

White Lithium Grease

- Multi-purpose lithium lubricant with a very high index oil which greatly enhances the overall lubricity to the formula
- The base grease also offers excellent corrosion resistance
- The light color greases used offer acceptability where normal greases are objectionable because of color
- For use in automobile applications such as: door and hood hinges, stop latches, striker plates, power radio antennas, speedometer cables, window and wiper mechanisms, brake parts and springs.
- Can also be used with machinery and tools, chains, slides, cables, tractors, conveyors, air conditioners, fans etc.
- Highly heat resistant 375° F
- Withstands strong weather conditions

Industrial Grade Silicone Lubricant

- This product is a clear high viscosity silicone
- Lubricating properties are retained as low as 40°F and as high as 400°F
- Formulated with 10% silicone for light duty applications
- Designed to penetrate the surface pores of synthetics, plastics, rubbers, neoprene and wood
- Remains fluid and will not thicken with age
- Eliminates wear and tear making parts last longer
- Non-staining allowing for use on many kinds of materials
- Provides instant slip for easy removal of parts

Multi-Service Anti-Seize Compound

- This is a low friction, anti-seize lubricant
- Manufactured from combination forms of micro-size copper flakes and graphite. With the unique blend of ingredients an effective matrix between mated surfaces is created and is unaffected by contraction and expansion changes
- Resists welding, hardening and setting
- Low shear resistance between particles reduces stick-slip, allowing quick disassembly with minimum wrench torque
- Will not squeeze out of threads, gum-upon wash off
- This product works well on nuts, flanges, tees, adapters, taps, unions, couplings, u-bolts, joints, manifolds, lifts, packing, bolts studs, elbows, return bends, keyways, tube threads, press fittings, gaskets, etc.

Light Duty Silicone Release Lubricant

- This product is a clear high viscosity silicone
- Especially formulated to be used as a mold release agent
- Its lubricating properties are retained as low as 40° F and as high as 400° F
- Formulated with 2% silicone for light duty applications
- Designed to penetrate the surface pores of synthetics, plastics, rubbers, neoprene, wood, etc.
- Remains fluid and will not thicken with age
- When used as directed, it will not harm plastics or painted surfaces
- Dries fast and is long lasting

Dry Graphite Lubricant

- This product is a “Graphite Paint”, applied like a paint and dries like a paint
- Uses a dry colloidal graphite for high and low temperature extremes
- When dry, the product becomes a long-lasting slippery surface with a bond strength of approximately 3000psi
- Works well on metal or wood slides and glides and glides, holding bins, chains and sprockets, conveyors, lawn mower housings, lawn and garden tools, bearings, locks, springs and pre-assembly lubrication of moving parts
- Bonds quickly to any clean metal, wood, concrete, and most plastics
- Dry coating will not gather dirt or grit
- Will conduct heat and electricity
- Will continue to lubricate under heavy loads up to 18,000 PSI

High Temperature Dry “Moly” Lubricant

- This formula offers superior lubricity by eliminating friction and reducing wear
- Offers a melting temperature of 2000° F which is twice the melting point of steel
- Protects against rust and waterproofs
- Applicable in severe weather conditions
- The dry Molybdenum Sulfide offers low shear resistance which allows for long lasting lubricity
- Moly clings to metal surfaces which makes for a stronger, harder alloy
- Works well on wire drawing, metal extrusions, conveyor belts in high heat conditions

Food Grade Silicone Release Agent

- Specially formulated for use in food processing areas and equipment adjacent to foods
- Excellent lubricant for all types of food processing machinery including bakeries, bottling operations, paper converters, heat sealing equipment, etc
- Will penetrate the surface of plastics and rubber as well as metal to provide non-tacky lubrication
- This formula is colorless, odorless and tasteless.

Dry PTFE Lubricant

- This formula functions as a smooth, quick drying and greaseless white film lubricant for all types of surfaces
- Has a very low coefficient of friction and is totally insoluble to water
- Will not react with process materials and offers excellent resistance to most chemicals and organic solvents
- This formula is also resistant to acids and has a temperature range of -400°F to +500°F
- Unlike moist grease and oil base lubricants, this product will not collect dirt and dust
- For use in lubricating and sealing packing glands, saw blades, conveyors, channels, sliding frames, cutting blades, pipe threads, etc.
- Dries quickly to a clean white film
- Excellent for low load friction applications

Food Grade White Grease

- Excellent lubricant, release agent
- Can be used as anti-rust film on equipment and machine parts in locations that are exposed to food
- Provides excellent extreme pressure and anti-wear protection and
- Can be used over a wide range of operating temperatures.

Food Grade Machinery Lubricant

- Special lubricant formulated for use on food processing equipment
- Excellent penetrating characteristics that loosen rust, dirt and leave a thin film
- A general purpose lubricant and rust preventative that does not contain acids
- Has no unpleasant odor
- Exhibits excellent water displacement
- Will continue to lubricate up to 250°F

Heavy Duty Web Adhesive

- Excellent formula for professional applications
- Can be applied in permanent bonding, as well as temporary bonding applications when applied as directed
- Provides superior resistance to moisture, high temperature and water
- Excellent results are obtained when bonding a broad range of materials including carpet, foam materials, metal, fabric, wood, paper, leather, plastic and other surfaces
- 3-Way Adjustable Spray Valve
- Webbing Type Spray Pattern
- Non-staining and versatile formula makes for a product that will bond a broad range of materials
- Provides high strength in tough conditions

Leak Finder (Powder Based)

- This product is a simple way to locate leaks on any part of a vehicle
- Highly sensitive powder can be sprayed in the area of a suspected leak and it will quickly reveal the location
- For use with door, trunk, and hatchback weather-strips
- Also effective in finding oil leaks; make sure to verify that the spot to be checked is clean from any oil, grease and fluid

Heavy Duty Trim Adhesive

- Professional Spray Adhesive Formula
- For use in binding vinyl, leather, plastic, foam, metal, wood, corrugated and other similar substrates
- Provides fast tackiness
- Repositionable up to 2 hours later
- Works well in all temperature ranges
- Excellent for gasket assembly and head liner positioning

Ammoniated Glass Cleaner

- Non-streaking, film free glass cleaning
- Foamy formulation that will stay in place
- Made for heavy duty cleaning applications

Penetrating Oil

- Helps protect metal surfaces from corrosion
- Exhibits excellent water displacement properties
- Penetrates dirt, grease and grime
- Good Lubricating characteristics

Foaming Engine Degreaser

- Quick, easy way to remove grease and oil from engines
- Contains no petroleum distillates
- Spray on, let soak, rinse away with water
- For use on all types of engines
- Leaves behind a fresh orange fragrance

High Flash Solvent/Degreaser

- High flash point of 208 F
- Cuts through dirt, grease and grime
- Safe and non-flammable
- Excellent alternative to chlorinated solvents
- Can also be used in paint and graffiti removal

EP2 Grease

- High load “extreme pressure” performance
- Advanced rust and corrosion protection
- Will resist water wash-off

Chain & Cable Lubricant

- Fortified with anti-corrosion properties
- Provides superior anti-wear protection
- Excellent temperature stability
- For use on all types of chains and chain links

Bio Brake Cleaner

- Strong Formula for heavy duty cleaning jobs
- Leaves no residue
- Cleans deep and evaporates
- High Pressure spray

Stainless Steel Cleaner

- Non abrasive formulation
- Cleans and brightens stainless steel substrates
- Keeps stainless steel, aluminum and chrome looking new
- Helps prevent water spots and fingerprints

Rubberized Undercoating

- Designed for all under fender and underbody applications as well as trunk interiors
- Will not sag or run
- Fast drying and very easy to apply
- Excellent abrasion resistance
- Will retain its black color
- Will dry thoroughly and still remain flexible
- Will seal out dust, fumes, heat and cold

Amber Rust-Proofing

- Specially formulated coating which provides superior protection against corrosion
- Remains tacky and flexible once applied
- Flow grade formula allows for reaching of hard-to-access areas
- Very efficient replacement for OEM corrosion protection found on the interior of fender and o)panel replacements
- *Special 3 foot extension tube with 360° tip available with this product*

Copper Weld-Through Primer

- Copper enriched formulation
- Exhibits superior conductive properties
- Excellent corrosion resistance

Multi Surface Adhesion Promoter

- Enhances the adhesion, appearance and durability of all types of finishes
- Can be used under primers on flexible and rigid plastic parts
- Can be used for edging and blending areas
- For use on plastic interior and exterior parts (PP,PE, TPO, SMC etc.)

Textured Coating (White & Black)

- Rapid dry, flexible protective coating
- Exhibits excellent chip resistance
- Can be used under enamels and lacquers
- Paintable in 30 to 45 minutes

Paintable Undercoating

- Provides excellent corrosion protection to metal, contains no asphalt and is ideal for use on new panel and fender replacements
- Heavy bodied with excellent adhesion properties
- Given its abrasion resistance it will not crack or chip with age
- Fully paintable and fast drying
- This product contains no asphalt
- Has excellent corrosion resistance

Zinc Rich Primer

- Weld through primer designed to restore original corrosion protection to body panels repaired by welding
- Fast drying and resists sags and settling
- Water resistant upon completed dry time
- Heat resistant to 500°F
- Provides long lasting protection for metal surfaces and may be top-coated if desired

Bright Zinc Primer

- Fast drying and resists sags and settling
- Water resistant upon completed dry time
- Heat resistant to 500°F
- Provides long lasting protection for metal surfaces and may be top-coated if desired

Self Etching Primer

- Ready-to-use metal etching primer
- Protects against corrosion to bare metal.
- Eliminates the need for conditioning metal
- Paintable in 60 minutes

Clear Coat Spray

- Excellent acrylic clear designed for use when performing small spot and panel repairs
- For use on replacement parts, door jambs, hood and trunk jambs and cut-ins.
- Fast drying

Premium Fuel System Cleaner

- 1 Tank Clean-up of Carburetor, port fuel injectors, intake valves and ports and combustion chamber
- Removes intake valve stem gum
- Aids in prevention and elimination of harmful deposits from building up in the gas tank

Radiator Flush

- Safely cleans and loosens tough organic deposits that result from oil, fouling, grease and glycol oxidation residue
- Will loosen and remove gum/varnish
- Safe for use on all cooling system components

Radiator & Water Pump Lubricant/Conditioner

- Protects interior radiator system and parts from corrosion
- Stops cooling system rust, scale and corrosion
- Leaves behind a protective film to prevent rust formation
- Silicone and Phosphate Free

Diesel Fuel Conditioner and Supplement

- Cleans diesel fuel injectors
- Protects the fuel pump & injector components from low lubricity damage
- Removes moisture, gum and varnish deposits

Automatic Transmission Conditioner

- Extend the life of Transmission fluid
- Efficient way of softening seals and o-rings to prevent leaks
- Prevents oxidation and deposits
- Eliminates premature wear

Automatic Transmission Flush

- Concentrated formula quickly removes accumulated deposits in automatic transmission systems.
- Safely removes deposits from the valve body, filter screen and other automatic transmission parts

Power Steering Conditioner

- Provides maximum protection to power steering fluid
- Increased optimal performance
- Enhanced to reduce system wear and stops squeaks
- Keeps systems running smooth

Power Steering Cleaner

- Safely cleans systems of debris and contaminated lubricants
- Dissolves hard, burned on varnish deposit to allow components to move freely

Engine Oil Supplement

- Protects internal engine components
- Neutralizes crankcase acids
- Reduces oil burning, wear and corrosion
